Wind Direction(deg.)	27	328	309	285	250

# Agro meteorological Advisories:

General
Advice

- Rain fall: Dry, cold clear weather forecasted next five days.
- **Temperature:** Maximum and minimum temperature likely to be in range of 27-29°c and 11-13°c, respectively.
- **Relative Humidity**: The RH-I and RH-II is likely to be in the range of 40-78% &15-33, respectively.
- Wind Direction and Speed: Direction and speed of wind is likely to be NE, NW, W and 10-14 km/h, respectively.

Crops	Stage	Insect/Pest/ Variety	Advisory
Garlic	Girthing	Thrips and aphid leaf blight	For thrips&aphid control spray neem seed extract 5% and make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml with imidacloprid 17.8 % EC 5 ml in 10 liters of water.
		(yellowing)	To prevent leaf blight (yellowing) disease infestation in garlic spray Mencozeb 27 gm in 10 liters of water at 10 days interval as precautionary measure.  Do not over irrigate to prevent leaf yellowing disease.
Chick pea	Flowering/pod formation	Monitor the crop regularly for prodenia and heliothes	Under present weather condition heliothes infestation observed in chickpea. So, Monitor the crop regularly for heliothes and prodenia infstation.  • "T" shaped bird perches in and around crop field to be

		infestation	installed for natural controlling the insect population.
			<ul> <li>Spray neem seed extract 5 % or neem seed oil 50 mlin 10 liters of water.</li> <li>If infestation cross ETL spray 3 ml Spinosad in 10 liters of water.</li> <li>Also to prevent blight disease infestation spray Mencozeb 27 gm in 10 liters of water at 10 days interval as precautionary measure.</li> <li>Irrigate gram crop at flowering stage.</li> </ul>
Cumin	Flowering/gr ain formation	Aphid and thrips	Under present weather condition attack of thrips and aphids has been reported sprayAcetamiprid 5 gm or imidacloprid 17.8 % 5 ml/10 liters of water.
		Blight and Powery mildew	Under present weather condition spray tebuconazole 10 ml/10 liters of water to prevent blight and powdery mildew infestation.
		Wilt	Stop irrigation to prevent further infection in standing crop.
Coriander	Flowering/grai n formation	Thrips and Jassids	To control sucking pest spray neem seed extract 5 % or neem seed oil 50 ml and 15 gm Acepahte in 10 litres of water.  Under present weather condition spray Hexaconazole 15 ml/10 liters of water to prevent blight and powdery mildew infestation.
Wheat	Flowering/mil king	-	<ul> <li>Apply irrigation at critical stage without stress.</li> <li>To improve the quality of wheat grain spray 2 % uria solution before the last irrigation and spray mancozeb @ 25 gm/10 lit of water.</li> </ul>

Cotton	Picking & pulling of cotton stalk	Heavy aatack of pink boll worm observed in cotton field. Carry out picking in time.  Animals like goats, sheep among others, should be allowed to graze on unopened bolls and plant debris in the cotton fields after the last picking to prevent infestation of pink boll worm in subsequent year. After grazing don't burn cotton stalksbut, recycle the stalk by thedoin situ chopping & burying of cotton stalk in soil by mobile chopper and rotavator or make compost from the cotton residues to improve soil biomass and health.			
Castor	Capsule formation/ development	Jassids& white fly→  Spray Acetamiprid 20 % SP@ gmORimidacloprid 30.5 % 3 ml with neem extract 500 ml or neem oil 40 mla / 10 lit of ml/10 lit of water.			
		Pod borer	For the control of pod borer spray chlorantraniliprole18.5 % SC 3.0 ml or DDVP 7 ml/10 litre of water is advised against fruit borer.		
Pigeon pea	Flowering/pod formation/dev elopment	Pod fly	<ul> <li>Spray neem seed extract 5 % or neem seed oil 50 mlin 10 litres of water.</li> <li>If infestation cross ETL spray 20 ml Quinalphos or 5 ml Dichlorvos in 10 litres of water.</li> </ul>		
Onion	TP/Growth	Thrips  Leaf blight→	For thrips control spray neem seed extract 5% and Make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml in 10 liters of water at 10 days interval.  Make alternate sprayofMencozeb 25 gm and Carbendazim 10gm in 10 liters of water at 10 days interval.		
Brinjal& Tomato	Flowering/ fruiting	Sucking pest→  Shoot &Fruit borer	Monitor the crop for infestation of jassid& white fly in brinjal, if require spray 500 ml of 5 % neem seed extract or neem seed oil 50 ml with diafenthiuron 50 %wp @ 16 gm / 10 lit of water. In brinjal and tomato constant monitoring of borers by using pheromone traps 4-6 per acre is advised, If insect population is above ETL than spraying of chlorantraniliprole18.5 % SC 3.0 ml or DDVP7 ml/10 litre of water is advised against fruit borer.		

		Mites	If infetation is found, then make spraying of Propargite 57 % EC @ 10 ml/ 10litre of water for the control of Mites under clear sky.
Chili	Flowering & fruiting	Thrips→	Under present weather conditions severe attack of thrips has been reported. Spray Ethion 20 ml with 500 ml of 5 % neem seed extract or neem seed oil 50 ml in 10 litres of water. In case of heavy attack make spray of spinosad or spinetoram 3 ml per 10 liter of water.
		Anthracnose →	For the control of Anthracnose spray Mencozeb 27gm OR Chlorothalonil 27 gram OR Fosetyl 20 gm in 10 liters of water at 15 days interval.
Lemon	Flowering and fruit formation	Psylla and thrips	To prevent damage of psylla&thrips spray imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water.
		Citrus canker Leaf minor	Spray copper oxychloride 40 gm or streptocyclin1.5 gm in 10 litre of water.  Spray Dichlorvos 10 ml or Quinalphos 20 ml in 10 litres of water for control of leafminor.
Mango	Flowering	Blossom midge and Leaf hopper→	To prevent damage spray imidacloprid 5 ml/10 litres of water.
		Powdery Mildew→	Spray 15 gmcarbendazim in 10 liters of water to prevent powdery mildew disease in mango.

Spray Deltamethrin or Amitraz 2 ml/litre of water for the control of tick. Carry out Brucella and other infectious& reproductive diseases evaluation. Spray phenyl in the animal shed to avoid flys and mosquitoes.

**Keep young calves indoors during night time to avoid cold stress.**Provide 6-8 kg good quality dry roughage with 15-20 kg green fodder to the animals.Provide ad lib warm water to lactating animals. Keep animal shed hygienic and clean to avoid flies and mosquitoes. For milch animals, regularly follow schedule of 1 kg feed + 50 g mineral mixture per 2 liters of milk yield. Feed animals with a mixture of green grass + hay + minerals + dry feed.

### Agro met Advisory Service bulletinNo.-86 for the DevbhumiDwarka district

(Issued jointly by DFRS, J.A.U., Targhadia (Rajkot) and India Meteorological Department)

(Period 25 to 29-January-2020)

#### Weather forecast until 08-30 hrs. of 29/01/2020

#### (4) DEVBHUMI DWARKA DISTRICT:

	25/01/20	26/01/20	27/01/20	28/01/20	29/01/20
Rainfall (mm)	0	0	0	0	0
Max. Temp.(°C)	26	26	26	25	24
Min. Temp.(°C)	17	17	17	16	15
Total CC (octa)	0	0	0	0	0
RH-I (%)	55	64	80	79	62
RH-II (%)	28	27	39	49	39
Wind Speed (kmph)	12	16	13	19	15
Wind Direction(deg.)	35	349	323	288	137

#### Agro meteorological Advisories:-

General
Advice

- Rain fall: Dry, cold and clear weather forecasted next five days.
- **Temperature:** Maximum and minimum temperature likely to be in range of 24-26°c and 15-17°c, respectively.
- **Relative Humidity**: The RH-I and RH-II is likely to be in the range of 55-80% &27-49, respectively.
- Wind Direction and Speed: Direction and speed of wind is likely to be NE, N, NW, W, SE and 12-19 km/h, respectively.

Crops	Stage	Insect/Pest/ Variety	Advisory
Garlic	Girthing	Thrips and aphid	For thrips&aphid control spray neem seed extract 5% and make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml with imidacloprid 17.8 % EC 5 ml in 10 liters of water.

		leaf blight (yellowing)	To prevent leaf blight (yellowing) disease infestation in garlic spray Mencozeb 27 gm in 10 liters of water at 10 days interval as precautionary measure.  Do not over irrigate to prevent leaf yellowing disease.
Chick pea	Flowering/pod formation	Monitor the crop regularly for prodenia and heliothes infestation	<ul> <li>Under present weather condition heliothes infestation observed in chickpea. So, Monitor the crop regularly for heliothes and prodenia infstation.</li> <li>"T" shaped bird perches in and around crop field to be installed for natural controlling the insect population.</li> <li>Spray neem seed extract 5 % or neem seed oil 50 mlin 10 liters of water.</li> <li>If infestation cross ETL spray 3 ml Spinosad in 10 liters of water.</li> <li>Also to prevent blight disease infestation spray Mencozeb 27 gm in 10 liters of water at 10 days interval as precautionary measure.</li> <li>Irrigate gram crop at flowering stage.</li> </ul>

Cumin	Flowering/gr ain formation	Aphid and thrips	Under present weather condition attack of thrips and aphids has been reported sprayAcetamiprid 5 gm or imidacloprid 17.8 % 5 ml/10 liters of water.
		Blight and Powery mildew	Under present weather condition spray <b>tebuconazole</b> 10 ml/10 liters of water to prevent blight and powdery mildew infestation.
		Wilt	Stop irrigation to prevent further infection in standing crop.
Coriander	Flowering/grai n formation	Thrips and Jassids	To control sucking pest spray neem seed extract 5 % or neem seed oil 50 ml and 15 gm Acepahte in 10 litres of water.  Under present weather condition spray Hexaconazole 15 ml/10 liters of water to prevent blight and powdery mildew infestation.
Wheat	Flowering/mil king	-	Apply irrigation at critical stage without stress.
Cotton	Picking & pulling of cotton stalk	time. Animals like goats unopened bolls an to prevent infestate don't burn cott chopping & bury	hk boll worm observed in cotton field. Carry out picking in s, sheep among others, should be allowed to graze on d plant debris in the cotton fields after the last picking ion of pink boll worm in subsequent year. After grazing on stalksbut, recycle the stalk by thedoin situlying of cotton stalk in soil by mobile chopper and ake compost from the cotton residues to improve health.

Castor	Capsule formation/ development	Jassids& white fly→  Pod borer	Spray Acetamiprid 20 % SP@ 5.0 gmORimidacloprid 30.5 % 3 ml with neem seed extract 500 ml or neem oil 40 mla / 10 lit of water ml/10 lit of water.  For the control of pod borer spray chlorantraniliprole18.5 % SC 3.0 ml or DDVP 7 ml/10 litre of water is advised against fruit borer.
Pigeon pea	Flowering/pod formation/dev elopment	Pod fly	<ul> <li>Spray neem seed extract 5 % or neem seed oil 50 mlin 10 litres of water.</li> <li>If infestation cross ETL spray 20 ml Quinalphos or 5 ml Dichlorvos in 10 litres of water.</li> </ul>
Onion	TP/Growth	Thrips  Leaf blight→	For thrips control spray neem seed extract 5% and Make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml in 10 liters of water at 10 days interval.  Make alternate sprayofMencozeb 25 gm and Carbendazim 10gm in 10 liters of water at 10 days interval.
Brinjal& Tomato	Flowering/ fruiting	Sucking pest→  Shoot &Fruit borer	Monitor the crop for infestation of jassid& white fly in brinjal, if require spray 500 ml of 5 % neem seed extract or neem seed oil 50 ml with diafenthiuron 50 %wp @ 16 gm / 10 lit of water. In brinjal and tomato constant monitoring of borers by using pheromone traps 4-6 per acre is advised, If insect population is above ETL than spraying of chlorantraniliprole18.5 % SC 3.0 ml or DDVP7 ml/10 litre of water is advised against fruit borer.
		Mites	If infetation is found, then make spraying of Propargite 57 % EC @ 10 ml/ 10litre of water for the control of Mites under clear sky.

Chili	Flowering & fruiting	Thrips→	Under present weather conditions severe attack of thrips has been reported. Spray Ethion 20 ml with500 ml of 5 % neem seed extract or neem seed oil 50 ml in 10 litres of water. In case of heavy attack make spray of spinosad or spinetoram 3 ml per 10 liter of water.
		Anthracnose →	For the control of Anthracnose spray Mencozeb 27gm OR Chlorothalonil 27 gram OR Fosetyl 20 gm in 10 liters of water at 15 days interval.
Lemon	Flowering and fruit formation	Psylla and thrips	To prevent damage of psylla&thrips spray imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water.
		Citrus canker Leaf minor	Spray copper oxychloride 40 gm or streptocyclin1.5 gm in 10 litre of water.  Spray Dichlorvos 10 ml or Quinalphos 20 ml in 10 litres of water for control of leafminor.
Mango	Flowering	Blossom midge and Leaf hopper→	To prevent damage spray imidacloprid 5 ml/10 litres of water.
		Powdery Mildew→	Spray 15 gmcarbendazim in 10 liters of water to prevent powdery mildew disease in mango.
Livestock & poultry	Brucella and of animal shed to <b>Keep young</b> of	other infectious& re avoid flys and mosc calves indoors dur	ml/litre of water for the control of tick. Carry out eproductive diseases evaluation. Spray phenyl in the quitoes.  ing night time to avoid cold stress. Provide 6-8 kg

good quality dry roughage with 15-20 kg green fodder to the animals.Provide ad lib

warm water to lactating animals. Keep animal shed hygienic and clean to avoid flies and mosquitoes. For milch animals, regularly follow schedule of 1 kg feed + 50 g mineral mixture per 2 liters of milk yield. Feed animals with a mixture of green grass + hay + minerals + dry feed.

## Agro meteorological Advisories:

General
Advice

- Rain fall: Dry, cold and clear weather forecasted next five days.
- **Temperature:** Maximum and minimum temperature likely to be in range of 27-29°c and 13-15°c, respectively.
- **Relative Humidity**: The RH-I and RH-II is likely to be in the range of 40-81% & 20-38, respectively.
- Wind Direction and Speed: Direction and speed of wind is likely to be N, SE, W, NW and 9-14 km/h, respectively.

		T	
Crops	Stage	Insect/Pest/	Advisory
		Variety	
Garlic	Girthing	Thrips and aphid	For thrips&aphid control spray neem seed extract
			5% and make alternative sprays of profenofos 20 ml
			and lambda-cyhalothrin 14 ml with imidacloprid 17.8
			% EC 5 ml in 10 liters of water.
		leaf blight	
		(yellowing)	
			To prevent leaf blight (yellowing) disease infestation
			in garlic spray Mencozeb 27 gm in 10 liters of water
		<b>外</b> 外处无辩	at 10 days interval as precautionary measure.
		* XXXX	Do not over irrigate to prevent leaf yellowing
			disease.
Chick pea	Flowering/pod	Monitor the crop	Under present weather condition heliothes infestation
	formation	regularly for	observed in chickpea. So, Monitor the crop regularly for
		prodenia and	heliothes and prodenia infstation.
		heliothes	• "T" shaped bird perches in and around crop field to be
		infestation	installed for natural controlling the insect population.
			• Spray neem seed extract 5 % or neem
			seed oil 50 mlin 10 liters of water.
			• If infestation cross ETL spray 3 ml
			Spinosad in 10 liters of water.

			<ul> <li>Also to prevent blight disease infestation spray Mencozeb 27 gm in 10 liters of water at 10 days interval as precautionary measure.</li> <li>Irrigate gram crop at flowering stage.</li> </ul>
Cumin	Flowering/gr ain formation	Aphid and thrips	Under present weather condition attack of thrips and aphids has been reported sprayAcetamiprid 5 gm or imidacloprid 17.8 % 5 ml/10 liters of water.
		Blight and Powery mildew	Under present weather condition spray <b>tebuconazole</b> 10 ml/10 liters of water to prevent blight and powdery mildew infestation.
		Wilt	Stop irrigation to prevent further infection in standing crop.
Coriander	Flowering/grai n formation	Thrips and Jassids	To control sucking pest spray neem seed extract 5 % or neem seed oil 50 ml and 15 gm Acepahte in 10 litres of water.  Under present weather condition spray Hexaconazole 15 ml/10 liters of water to prevent blight and powdery mildew infestation.
Wheat	Flowering/mil king	-	Apply irrigation at critical stage without stress.
Cotton	Picking & pulling of cotton stalk	time. Animals like goats unopened bolls and to prevent infestati don't burn cotte chopping & bury	k boll worm observed in cotton field. Carry out picking in s, sheep among others, should be allowed to graze on d plant debris in the cotton fields after the last picking on of pink boll worm in subsequent year. After grazing on stalksbut, recycle the stalk by thedoin situring of cotton stalk in soil by mobile chopper and ake compost from the cotton residues to improve health.

Castor	Capsule formation/ development	Jassids& white fly→  Pod borer	Spray Acetamiprid 20 % SP@ 5.0 gmORimidacloprid 30.5 % 3 ml with neem seed extract 500 ml or neem oil 40 mla / 10 lit of water ml/10 lit of water.  For the control of pod borer spray chlorantraniliprole18.5 % SC 3.0 ml or DDVP 7 ml/10 litre of water is advised against fruit borer.

# Agro meteorological advisories:

General
Advice

- Rain fall: Dry, cold and clear weather forecasted next five days.
- **Temperature:** Maximum and minimum temperature likely to be in range of 29-31°c and 12-14°c, respectively.
- **Relative Humidity**: The RH-I and RH-II is likely to be in the range of 39-73% &19-37, respectively.
- Wind Direction and Speed: Direction and speed of wind is likely to be NE, SW, W and 9-16 km/h, respectively.

Crops	Stage	Insect/Pest/ Variety	Advisory
Garlic	Girthing	Thrips and aphid leaf blight	For thrips&aphid control spray neem seed extract 5% and make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml with imidacloprid 17.8 % EC 5 ml in 10 liters of water.
		(yellowing)	To prevent leaf blight (yellowing) disease infestation in garlic spray Mencozeb 27 gm in 10 liters of water at 10 days interval as precautionary measure.  Do not over irrigate to prevent leaf yellowing disease.
Chick pea	Flowering/pod formation	Monitor the crop regularly for prodenia and heliothes infestation	<ul> <li>Under present weather condition heliothes infestation observed in chickpea. So, Monitor the crop regularly for heliothes and prodenia infstation.</li> <li>"T" shaped bird perches in and around crop field to be installed for natural controlling the insect population.</li> <li>Spray neem seed extract 5 % or neem seed oil 50 mlin 10 liters of water.</li> <li>If infestation cross ETL spray 3 ml Spinosad in 10 liters of water.</li> <li>Also to prevent blight disease</li> </ul>

			infestation spray Mencozeb 27 gm in 10 liters of water at 10 days interval as precautionary measure.
			• Irrigate gram crop at flowering stage.
Cumin	Flowering/gr ain formation	Aphid and thrips	Under present weather condition attack of thrips and aphids has been reported sprayAcetamiprid 5 gm or imidacloprid 17.8 % 5 ml/10 liters of water.
		Blight and Powery mildew	Under present weather condition spray <b>tebuconazole</b> 10 ml/10 liters of water to prevent blight and powdery mildew infestation.
			00/01/2002
		Wilt	Stop irrigation to prevent further infection in standing crop.
Coriander	Flowering/grai n formation	Thrips and Jassids	To control sucking pest spray neem seed extract 5 % or neem seed oil 50 ml and 15 gm Acepahte in 10 litres of water.  Under present weather condition spray Hexaconazole 15 ml/10 liters of water to prevent blight and powdery mildew infestation.
Wheat	Flowering/mil king	-	Apply irrigation at critical stage without stress.
Cotton	Picking & pulling of cotton stalk	Heavy aatack of pink boll worm observed in cotton field. Carry out picking in time.  Animals like goats, sheep among others, should be allowed to graze on unopened bolls and plant debris in the cotton fields after the last picking to prevent infestation of pink boll worm in subsequent year. After grazing don't burn cotton stalksbut, recycle the stalk by thedoin situ chopping & burying of cotton stalk in soil by mobile chopper and rotavator or make compost from the cotton residues to improve soil biomass and health.	

Castor	Capsule formation/ development	Jassids& white fly→  Pod borer	Spray Acetamiprid 20 % SP@ 5.0 gmORimidacloprid 30.5 % 3 ml with neem seed extract 500 ml or neem oil 40 mla / 10 lit of water ml/10 lit of water.  For the control of pod borer spray chlorantraniliprole18.5 % SC 3.0 ml or DDVP 7 ml/10 litre of water is advised against fruit borer.
Pigeon pea	Flowering/pod formation/dev elopment	Pod fly	<ul> <li>Spray neem seed extract 5 % or neem seed oil 50 mlin 10 litres of water.</li> <li>If infestation cross ETL spray 20 ml Quinalphos or 5 ml Dichlorvos in 10 litres of water.</li> </ul>
Onion	TP/Growth	Thrips  Leaf blight→	For thrips control spray neem seed extract 5% and Make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml in 10 liters of water at 10 days interval.  Make alternate sprayofMencozeb 25 gm and Carbendazim 10gm in 10 liters of water at 10 days interval.
Brinjal& Tomato	Flowering/ fruiting	Sucking pest→  Shoot &Fruit borer	Monitor the crop for infestation of jassid& white fly in brinjal, if require spray 500 ml of 5 % neem seed extract or neem seed oil 50 ml with diafenthiuron 50 %wp @ 16 gm / 10 lit of water. In brinjal and tomato constant monitoring of borers by using pheromone traps 4-6 per acre is advised, If insect population is above ETL than spraying of chlorantraniliprole18.5 % SC 3.0 ml or DDVP7 ml/10 litre of water is advised against fruit borer.
		Mites	If infetation is found, then make spraying of Propargite 57 % EC @ 10 ml/ 10litre of water for the control of Mites under clear sky.

Chili	Flowering & fruiting	Thrips→	Under present weather conditions severe attack of thrips has been reported. Spray Ethion 20 ml with500 ml of 5 % neem seed extract or neem seed oil 50 ml in 10 litres of water. In case of heavy attack make spray of spinosad or spinetoram 3 ml per 10 liter of water.
		Anthracnose →	For the control of Anthracnose spray Mencozeb 27gm OR Chlorothalonil 27 gram OR Fosetyl 20 gm in 10 liters of water at 15 days interval.
Lemon	Flowering and fruit formation	Psylla and thrips	To prevent damage of psylla&thrips spray imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water.
		Citrus canker Leaf minor	Spray copper oxychloride 40 gm or streptocyclin1.5 gm in 10 litre of water.  Spray Dichlorvos 10 ml or Quinalphos 20 ml in 10 litres of water for control of leafminor.
Mango	Flowering	Blossom midge and Leaf hopper→	To prevent damage spray imidacloprid 5 ml/10 litres of water.
		Powdery Mildew→	Spray 15 gmcarbendazim in 10 liters of water to prevent powdery mildew disease in mango.
Livestock & poultry	Brucella and of animal shed to <b>Keep young</b> of	other infectious& re avoid flys and mosc calves indoors dur	ml/litre of water for the control of tick. Carry out eproductive diseases evaluation. Spray phenyl in the quitoes.  ing night time to avoid cold stress. Provide 6-8 kg

good quality dry roughage with 15-20 kg green fodder to the animals.Provide ad lib

warm water to lactating animals. Keep animal shed hygienic and clean to avoid flies and
mosquitoes. For milch animals, regularly follow schedule of 1 kg feed + 50 g mineral
mixture per 2 liters of milk yield. Feed animals with a mixture of green grass + hay +
minerals + dry feed.
