			@ 2 ml/litre of water is advised. Due to prevailing high temperature, light irrigation at short interval is advised.
Ridge gourd/ Bottle gourd/ Sponge gourd/ Bitter gourd	Flowering/Fr uiting	White fly Downy mildew &Alternaria blight	Sparyneem seed extract 500 ml or neem seed oil 50 ml in 10 litre of water at 15 days interval (4 sprays) or acetamiprid 20 % SP@ 5.0 gm / 10 lit of water at 15 days interval. Alternate three spray of Mancozeb 27 g or chlorothalonil 27 g or fosatyl 20 g/10 lit of water at 15 days interval.
Water melon	Fruiting	Thrips, white fly	To control them sprayneem seed extract 500 ml or neem seed oil 50 or neem oil 40 ml and acetamiprid 20 % SP@ 5.0 gm / 10 lit of water at 15 days interval.
Brinjal and tomato	Growing/fruit ing	Sucking pest, Fruit and shoot borer	To control them sprayneem seed extract 500 ml or neem seed oil 50 or neem oil 40 ml and acetamiprid 20 % SP@ 5.0 gm / 10 lit of water at 15 days interval. To control shoot and fruit borer, infested fruits and shoots should be collected and buried inside the soil. Installation of pheromone trap @ 2-3 traps per acre is advised for monitoring of borers. If pest population is high, spraying of Spinosad 48 EC @ 1 ml /4 litres of water is advised when sky remains clear.
Cucumbers	Growing/fruit ing	Thrips, white fly	To control them sprayneem seed extract 500 ml or neem seed oil 50 or neem oil 40 ml and acetamiprid 20 % SP@ 5.0 gm / 10 lit of water at 15 days interval
Chili	Flowering & fruiting	Thrips →	In present weather conditions severe attack of thrips has been reported. Spray 20 ml profenofosin 10 litres of water.
Lemon	Fruit development	Mite	Due to high temperature mites infestation in lemon orchard observed. To control mite infestation spray propargite 57 % EC 10/10 liter of water.
		Psylla and thrips	To prevent damage spray imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water. Irrigate crop at regular interval without stress to prevent fruit cracking and fast development of fruits.

Horticultural	For new cultivation of sapota, 1x1x1 m. size of pit should be digout at distance of 10x10
crops	or 8x8 m. While for lemon crop, 60x60x60 cm. size of pit should be digout at distance
	of 8x8 m. or 6x6 m. For pomegranate, 60x60x60 cm. size of pit should be digout at
	distance of 5x5 m. and for clustered apple, 45x45x45 cm. size of pit should be digout at
	distance of 8x8 m.
Livestock	Under present weather condition keep animals under well ventilated shade during day
& poultry	time and provide adlib clean drinking water. Increase the green fodder quantity for
	feeding. Supplimentry feeding of vitamins A and D should apply. Spray Deltamethrin or
	Amitraz 2 ml/litre of water for the control of tick. Deworming, T.B. and J.D. Testing should
	be done.
	Due to chance of light rainfall at isolated places keep animals indoors during rainfall.
	Keep fodder in safe place to avoid spoilage due to rainfall.

Seed treatment with Dithane M-45/Captan/vitavax @ 2 grams per kg of seeds before sowing is advised. As preventive measure for white grub infestation in groundnut crop treat the seed with Chlorpyrifos 20 % EC OR Quinalfos 25 % EC @ 25 ml/kg seed at the time of sowing.
Cotton	-	Early: Bg-II GCH-	Procure good quality of seeds for kharif Timely
		8, Agritop-333,	sowing should be done after sufficient rainfall.

		777, Jay, Beejdhan-2, Sarju, ATM, Bhakti, Medium Late:Bg- II GCH-6,	Apply 20 nitrogen kg/ha as basal for rainfed cotton.	
		Agritop-444, Solar-76, Swapna, Mallika		
Sesame	-	GT-2 or GT-3 variety.	Procure good quality of seeds for kharifsowing	
Pearl millet	-	GHB- 558,577,538,719,7 32,744	Procure good quality of seeds for kharifsowing	
Pulses	-	Farmers growing pulses are advised to select variety GM-4, K-851 for green gram, Guj. Adud-1 for black gram, Gujarat cowpea-1,2,4, PusaFalguni for cowpea, BDN-2, GT-100, GTH-1 for pigeon pea and Procure good quality of seeds irrespective of crops for kharifsowing.		
Vegetables	Nursery /Transplantin g	Farmers are advised for preparation of nursery for tomato, chilli, brinjal and early cauliflower (maturing in the month of September). It is also advised to use shed nets, which helps in reducing vector borne diseases and produce healthy seedlings. Nursery should be covered by net at the height of 6.5 feet for protection against sunlight. Transplanting of brinjal, chilli and early cauliflower are advised for those farmers whose seedlings are ready.		
	Sowing	Farmers are advised for sowing of Cucurbits in rainy season. It is most suitable time to sow recommended hybrids/ varieties. Some popular hybrids are Bottle Gourd- Pusa Naveen, Pusa Samridhi Bitter Gourd- Pusa Visesh, Pusa-2 mosumi, Pumpkin- Pusa Visvash, Pusa Vikash Ridge Gourd- Pusa Chikni etc. Faremrs are also advised for Sowing of ladyfinger, cluster bean, kidney bean, cowpea, tur, amranthus.		
Lady finger	Flowering/fru iting	White fly, Mites	To control them sprayneem seed extract 500 ml or neem seed oil 50 or neem oil 40 mland acetamiprid 20 % SP@ 5.0 gm / 10 lit of waterat 15 days interval. Constant monitoring of lady finger crop against attack of mite is advised. Spraying of propargite @ 2 ml/litre of water is advised. Due to prevailing high temperature, light irrigation at short interval is advised.	
Ridge gourd/ Bottle gourd/ Sponge gourd/ Bitter gourd	Flowering/Fr uiting	White fly Downy mildew &Alternaria blight	Sparyneem seed extract 500 ml or neem seed oil 50 ml in 10 litre of water at 15 days interval (4 sprays) or acetamiprid 20 % SP@ 5.0 gm / 10 lit of water at 15 days interval. Alternate three spray of Mancozeb 27 g or chlorothalonil 27 g or fosatyl 20 g/10 lit of water at 15 days interval.	

Water melon	Fruiting	Thrips, white fly	To control them sprayneem seed extract 500 ml or neem seed oil 50 or neem oil 40 ml and acetamiprid 20 % SP@ 5.0 gm / 10 lit of water at 15 days interval.	
Brinjal and tomato	Growing/fruit ing	Sucking pest, Fruit and shoot borer	To control them sprayneem seed extract 500 ml or neem seed oil 50 or neem oil 40 ml and acetamiprid 20 % SP@ 5.0 gm / 10 lit of water at 15 days interval. To control shoot and fruit borer, infested fruits and shoots should be collected and buried inside the soil. Installation of pheromone trap @ 2-3 traps per acre is advised for monitoring of borers. If pest population is high, spraying of Spinosad 48 EC @ 1 ml /4 litres of water is advised when sky remains clear.	
Cucumbers	Growing/fruit ing	Thrips, white fly	To control them sprayneem seed extract 500 ml or neem seed oil 50 or neem oil 40 ml and acetamiprid 20 % SP@ 5.0 gm / 10 lit of water at 15 days interval	
Chili	Flowering & fruiting	Thrips →	In present weather conditions severe attack of thrips has been reported. Spray 20 ml profenofosin 10 litres of water.	
Lemon	Fruit development	Mite	Due to high temperature mites infestation in lemon orchard observed. To control mite infestation spray propargite 57 % EC 10/10 liter of water.	
		Psylla and thrips	To prevent damage spray imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water. Irrigate crop at regular interval without stress to prevent fruit cracking and fast development of fruits.	
crops	For new cultivation of sapota, 1x1x1 m. size of pit should be digout at distance of 10x10 or 8x8 m. While for lemon crop, 60x60x60 cm. size of pit should be digout at distance of 8x8 m. or 6x6 m. For pomegranate, 60x60x60 cm. size of pit should be digout at distance of 5x5 m. and for clustered apple, 45x45x45 cm. size of pit should be digout at distance of 8x8 m.			
Livestock & poultry	Under present weather condition keep animals under well ventilated shade during day time and provide adlib clean drinking water. Increase the green fodder quantity for			

fe A be

feeding. Supplimentry feeding of vitamins A and D should apply. Spray Deltamethrin or Amitraz 2 ml/litre of water for the control of tick. Deworming, T.B. and J.D. Testing should be done.

Due to chance of light rainfall at isolated places keep animals indoors during rainfall. Keep fodder in safe place to avoid spoilage due to rainfall.
