Crops	Stage	Insect/Pest/ Variety	Advisory	

Summer Groundnut  Summer Sesame	Sowing  Preparation for sowing	TAG-24,TG-37-A, TPG-41,GG-2, GJG-31	Carry out sowing of summer groundnut as temperature rises to 22-25° C and give seed treatment of Tebuconazole 1.25 gm/1 kg seed. Apply Single Super Phosphate 312 kg, Ammonium slphate 125 kg and Castor cake 250 kg/ha OR DAP 108 kg, Gypsum 250 kg and castor cake 250 kg/ha as basal.  Procure good quality seeds of sesame and carry out sowing of summer SESAME as minimum and maximum temperature rises up to 19 °C and 30°C, respectively and give seed treatment of vitavax (Carboxin 37.5% + Thiram 37.5%) or mencozeb or carbendazim 2-3 gm/1 kg seed. Apply Single Super Phosphate 156 kg and 55 kg urea/ha, OR DAP 54 kg and 33 kg urea/ha as basal.
Garlic	Girthing	Thrips and aphid  leaf blight (yellowing)	For thrips&aphid control spray neem seed extract 5% and make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml with imidacloprid 17.8 % EC 5 ml in 10 liters of water.  To prevent leaf blight (yellowing) disease infestation in garlic spray Mencozeb 27 gm in 10 liters of water at 10 days interval as precautionary measure.  Do not over irrigate to prevent leaf yellowing disease.
Chick pea	Flowering/pod formation	Monitor the crop regularly for prodenia and heliothes infestation	<ul> <li>Under present weather condition heliothes infestation observed in chickpea. So, Monitor the crop regularly for heliothes and prodenia infstation.</li> <li>"T" shaped bird perches in and around crop field to be installed for natural controlling the insect population.</li> <li>Spray neem seed extract 5 % or neem seed oil 50 mlin 10 liters of water.</li> <li>If infestation cross ETL spray 3 ml Spinosad in 10 liters of water.</li> <li>Also to prevent blight disease infestation spray Mencozeb 27 gm in 10 liters of water at 10 days interval as precautionary measure.</li> <li>Irrigate gram crop at flowering stage.</li> </ul>

Cumin	Flowering/gr ain formation	Aphid and thrips	Under present weather condition attack of thrips and aphids has been reported sprayAcetamiprid 5 gm or imidacloprid 17.8 % 5 ml/10 liters of water.
		Blight and Powery mildew	Under present weather condition spray tebuconazole 10 ml/10 liters of water to prevent blight and powdery mildew infestation.
		Wilt	Stop irrigation to prevent further infection in standing crop.
Coriander	Flowering/grai n formation	Thrips and Jassids	To control sucking pest spray neem seed extract 5 % or neem seed oil 50 ml and 15 gm Acepahte in 10 litres of water.  Under present weather condition spray Hexaconazole 15 ml/10 liters of water to prevent blight and powdery mildew infestation.
Wheat	Flowering/mil king	-	<ul> <li>Apply irrigation at critical stage without stress.</li> <li>To improve the quality of wheat grain spray 2 % uria solution before the last irrigation and spray mancozeb @ 25 gm/10 lit of water.</li> </ul>
Cotton	Picking & pulling of cotton stalk	Heavy aatack of pink boll worm observed in cotton field. Carry out picking in time.  Animals like goats, sheep among others, should be allowed to graze on unopened bolls and plant debris in the cotton fields after the last picking to prevent infestation of pink boll worm in subsequent year. After grazing don't burn cotton stalksbut, recycle the stalk by thedoin situ chopping & burying of cotton stalk in soil by mobile chopper and rotavator or make compost from the cotton residues to improvesoil biomass and health.	

Castor	Capsule formation/ development	Jassids& white fly→  Pod borer	Spray Acetamiprid 20 % SP@ 5.0 gmORimidacloprid 30.5 % 3 ml with neem seed extract 500 ml or neem oil 40 mla / 10 lit of water ml/10 lit of water.  For the control of pod borer spray chlorantraniliprole18.5 % SC 3.0 ml or DDVP 7 ml/10 litre of water is advised against fruit borer.
Pigeon pea	Flowering/pod formation/dev elopment	Pod fly	<ul> <li>Spray neem seed extract 5 % or neem seed oil 50 mlin 10 litres of water.</li> <li>If infestation cross ETL spray 20 ml Quinalphos or 5 ml Dichlorvos in 10 litres of water.</li> </ul>
Onion	TP/Growth	Thrips  Leaf blight→	For thrips control spray neem seed extract 5% and Make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml in 10 liters of water at 10 days interval.  Make alternate sprayofMencozeb 25 gm and Carbendazim 10gm in 10 liters of water at 10 days interval.
Brinjal& Tomato	Flowering/ fruiting	Sucking pest→  Shoot &Fruit borer	Monitor the crop for infestation of jassid& white fly in brinjal, if require spray 500 ml of 5 % neem seed extract or neem seed oil 50 ml with diafenthiuron 50 %wp @ 16 gm / 10 lit of water. In brinjal and tomato constant monitoring of borers by using pheromone traps 4-6 per acre is advised, If insect population is above ETL than spraying of chlorantraniliprole18.5 % SC 3.0 ml or DDVP7 ml/10 litre of water is advised against fruit borer.
		Mites	If infetation is found, then make spraying of Propargite 57 % EC @ 10 ml/ 10litre of water for the control of Mites under clear sky.

Chili	Flowering & fruiting	Thrips→	Under present weather conditions severe attack of thrips has been reported. Spray Ethion 20 ml with500 ml of 5 % neem seed extract or neem seed oil 50 ml in 10 litres of water. In case of heavy attack make spray of spinosad or spinetoram 3 ml per 10 liter of water.
		Anthracnose →	For the control of Anthracnose spray Mencozeb 27gm OR Chlorothalonil 27 gram OR Fosetyl 20 gm in 10 liters of water at 15 days interval.
Lemon	Flowering and fruit formation	Psylla and thrips	To prevent damage of psylla&thrips spray imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water.
		Citrus canker Leaf minor	Spray copper oxychloride 40 gm or streptocyclin1.5 gm in 10 litre of water.  Spray Dichlorvos 10 ml or Quinalphos 20 ml in 10 litres of water for control of leafminor.
Mango	Flowering	Blossom midge and Leaf hopper→	To prevent damage spray imidacloprid 5 ml/10 litres of water.
		Powdery Mildew→	Spray 15 gmcarbendazim in 10 liters of water to prevent powdery mildew disease in mango.
Livestock & poultry	Brucella and of animal shed to <b>Keep young</b> of	other infectious& re avoid flys and mosc calves indoors dur	ml/litre of water for the control of tick. Carry out eproductive diseases evaluation. Spray phenyl in the quitoes.  ing night time to avoid cold stress. Provide 6-8 kg

warm water to lactating animals. Keep animal shed hygienic and clean to avoid flies and
mosquitoes. For milch animals, regularly follow schedule of 1 kg feed + 50 g mineral
mixture per 2 liters of milk yield. Feed animals with a mixture of green grass + hay +
minerals + dry feed.

# Agro met Advisory Service bulletinNo.-87 for the Morbi district

(Issued jointly by DFRS, J.A.U., Targhadia (Rajkot) and India Meteorological Department) (Period 29-January to 02-February- 2020)

			To prevent leaf blight (yellowing) disease infestation
			in garlic spray Mencozeb 27 gm in 10 liters of water
		大人人人大量	at 10 days interval as precautionary measure.
			Do not over irrigate to prevent leaf yellowing
			disease.
Chick pea	Flowering/pod	Monitor the crop	Under present weather condition heliothes infestation
	formation	regularly for	observed in chickpea. So, Monitor the crop regularly for
		prodenia and	heliothes and prodenia infstation.
		heliothes	• "T" shaped bird perches in and around crop field to be
		infestation	installed for natural controlling the insect population.
			• Spray neem seed extract 5 % or neem
		A LAND LAND	seed oil 50 mlin 10 liters of water.
			If infestation cross ETL spray 3 ml
			Spinosad in 10 liters of water.
			Also to prevent blight disease
			infestation spray Mencozeb 27 gm in 10 liters of
			water at 10 days interval as precautionary measure.
			Irrigate gram crop at flowering stage.
		L	ı

Cumin	Flowering/gr ain formation	Aphid and thrips	Under present weather condition attack of thrips and aphids has been reported sprayAcetamiprid 5 gm or imidacloprid 17.8 % 5 ml/10 liters of water.
		Blight and Powery mildew	Under present weather condition spray <b>tebuconazole</b> 10 ml/10 liters of water to prevent blight and powdery mildew infestation.
		Wilt	Stop irrigation to prevent further infection in standing crop.
Coriander	Flowering/grai n formation	Thrips and Jassids	To control sucking pest spray neem seed extract 5 % or neem seed oil 50 ml and 15 gm Acepahte in 10 litres of water.  Under present weather condition spray Hexaconazole 15 ml/10 liters of water to prevent blight and powdery mildew infestation.
Wheat	Flowering/mil king	-	Apply irrigation at critical stage without stress.
Cotton	Picking & pulling of cotton stalk	Heavy aatack of pink boll worm observed in cotton field. Carry out picking it time.  Animals like goats, sheep among others, should be allowed to graze of unopened bolls and plant debris in the cotton fields after the last picking to prevent infestation of pink boll worm in subsequent year. After grazing don't burn cotton stalksbut, recycle the stalk by thedoin sittle chopping & burying of cotton stalk in soil by mobile chopper and rotavator or make compost from the cotton residues to improve soil biomass and health.	

Castor	Capsule formation/ development	Jassids& white fly→  Pod borer	Spray Acetamiprid 20 % SP@ 5.0 gmORimidacloprid 30.5 % 3 ml with neem seed extract 500 ml or neem oil 40 mla / 10 lit of water ml/10 lit of water.  For the control of pod borer spray chlorantraniliprole18.5 % SC 3.0 ml or DDVP 7 ml/10 litre of water is advised against fruit borer.
Pigeon pea	Flowering/pod formation/dev elopment	Pod fly	<ul> <li>Spray neem seed extract 5 % or neem seed oil 50 mlin 10 litres of water.</li> <li>If infestation cross ETL spray 20 ml Quinalphos or 5 ml Dichlorvos in 10 litres of water.</li> </ul>
Onion	TP/Growth	Thrips  Leaf blight→	For thrips control spray neem seed extract 5% and Make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml in 10 liters of water at 10 days interval.  Make alternate sprayofMencozeb 25 gm and Carbendazim 10gm in 10 liters of water at 10 days interval.
Brinjal& Tomato	Flowering/ fruiting	Sucking pest→  Shoot &Fruit borer	Monitor the crop for infestation of jassid& white fly in brinjal, if require spray 500 ml of 5 % neem seed extract or neem seed oil 50 ml with diafenthiuron 50 %wp @ 16 gm / 10 lit of water. In brinjal and tomato constant monitoring of borers by using pheromone traps 4-6 per acre is advised, If insect population is above ETL than spraying of chlorantraniliprole18.5 % SC 3.0 ml or DDVP7 ml/10 litre of water is advised against fruit borer.
		Mites	If infetation is found, then make spraying of Propargite 57 % EC @ 10 ml/ 10litre of water for the control of Mites under clear sky.

Chili	Flowering & fruiting	Thrips→	Under present weather conditions severe attack of thrips has been reported. Spray Ethion 20 ml with500 ml of 5 % neem seed extract or neem seed oil 50 ml in 10 litres of water. In case of heavy attack make spray of spinosad or spinetoram 3 ml per 10 liter of water.
		Anthracnose →	For the control of Anthracnose spray Mencozeb 27gm OR Chlorothalonil 27 gram OR Fosetyl 20 gm in 10 liters of water at 15 days interval.
Lemon	Flowering and fruit formation	Psylla and thrips	To prevent damage of psylla&thrips spray imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water.
		Citrus canker Leaf minor	Spray copper oxychloride 40 gm or streptocyclin1.5 gm in 10 litre of water.  Spray Dichlorvos 10 ml or Quinalphos 20 ml in 10 litres of water for control of leafminor.
Mango	Flowering	Blossom midge and Leaf hopper→	To prevent damage spray imidacloprid 5 ml/10 litres of water.
		Powdery Mildew→	Spray 15 gmcarbendazim in 10 liters of water to prevent powdery mildew disease in mango.
Livestock & poultry	Brucella and of animal shed to <b>Keep young</b> of	other infectious& re avoid flys and mosc calves indoors dur	ml/litre of water for the control of tick. Carry out eproductive diseases evaluation. Spray phenyl in the quitoes.  ing night time to avoid cold stress. Provide 6-8 kg

warm water to lactating animals. Keep animal shed hygienic and clean to avoid flies and
mosquitoes. For milch animals, regularly follow schedule of 1 kg feed + 50 g mineral
mixture per 2 liters of milk yield. Feed animals with a mixture of green grass + hay +
minerals + dry feed.

		Wilt	Stop irrigation to prevent further infection in standing crop.
Coriander	Flowering/grai n formation	Thrips and Jassids	To control sucking pest spray neem seed extract 5 % or neem seed oil 50 ml and 15 gm Acepahte in 10 litres of water.  Under present weather condition spray Hexaconazole 15 ml/10 liters of water to prevent blight and powdery mildew infestation.
Wheat	Flowering/mil king	-	Apply irrigation at critical stage without stress.
Cotton	Picking & pulling of cotton stalk	Heavy aatack of pink boll worm observed in cotton field. Carry out picking time.  Animals like goats, sheep among others, should be allowed to graze of unopened bolls and plant debris in the cotton fields after the last picking to prevent infestation of pink boll worm in subsequent year. After grazing don't burn cotton stalksbut, recycle the stalk by thedoin sittle chopping & burying of cotton stalk in soil by mobile chopper and rotavator or make compost from the cotton residues to improve soil biomass and health.	

Castor	Capsule formation/ development	Jassids& white fly→  Pod borer	Spray Acetamiprid 20 % SP@ 5.0 gmORimidacloprid 30.5 % 3 ml with neem seed extract 500 ml or neem oil 40 mla / 10 lit of water ml/10 lit of water.  For the control of pod borer spray chlorantraniliprole18.5 % SC 3.0 ml or DDVP 7 ml/10 litre of water is advised against fruit borer.
Pigeon pea	Flowering/pod formation/dev elopment	Pod fly	<ul> <li>Spray neem seed extract 5 % or neem seed oil 50 mlin 10 litres of water.</li> <li>If infestation cross ETL spray 20 ml Quinalphos or 5 ml Dichlorvos in 10 litres of water.</li> </ul>
Onion	TP/Growth	Thrips  Leaf blight→	For thrips control spray neem seed extract 5% and Make alternative sprays of profenofos 20 ml and lambda-cyhalothrin 14 ml in 10 liters of water at 10 days interval.  Make alternate sprayofMencozeb 25 gm and Carbendazim 10gm in 10 liters of water at 10 days interval.
Brinjal& Tomato	Flowering/ fruiting	Sucking pest→  Shoot &Fruit borer	Monitor the crop for infestation of jassid& white fly in brinjal, if require spray 500 ml of 5 % neem seed extract or neem seed oil 50 ml with diafenthiuron 50 %wp @ 16 gm / 10 lit of water. In brinjal and tomato constant monitoring of borers by using pheromone traps 4-6 per acre is advised, If insect population is above ETL than spraying of chlorantraniliprole18.5 % SC 3.0 ml or DDVP7 ml/10 litre of water is advised against fruit borer.
		Mites	If infetation is found, then make spraying of Propargite 57 % EC @ 10 ml/ 10litre of water for the control of Mites under clear sky.

Chili	Flowering & fruiting	Thrips→	Under present weather conditions severe attack of thrips has been reported. Spray Ethion 20 ml with500 ml of 5 % neem seed extract or neem seed oil 50 ml in 10 litres of water. In case of heavy attack make spray of spinosad or spinetoram 3 ml per 10 liter of water.
		Anthracnose →	For the control of Anthracnose spray Mencozeb 27gm OR Chlorothalonil 27 gram OR Fosetyl 20 gm in 10 liters of water at 15 days interval.
Lemon	Flowering and fruit formation	Psylla and thrips	To prevent damage of psylla&thrips spray imidacloprid 30.5 % 5 ml / 10 lit of water ml/10 lit of water.
		Citrus canker Leaf minor	Spray copper oxychloride 40 gm or streptocyclin1.5 gm in 10 litre of water.  Spray Dichlorvos 10 ml or Quinalphos 20 ml in 10 litres of water for control of leafminor.
Mango	Flowering	Blossom midge and Leaf hopper→	To prevent damage spray imidacloprid 5 ml/10 litres of water.
		Powdery Mildew→	Spray 15 gmcarbendazim in 10 liters of water to prevent powdery mildew disease in mango.
Livestock & poultry	Brucella and of animal shed to <b>Keep young</b> of	other infectious& re avoid flys and mosc calves indoors dur	ml/litre of water for the control of tick. Carry out eproductive diseases evaluation. Spray phenyl in the quitoes.  ing night time to avoid cold stress. Provide 6-8 kg

warm water to lactating animals. Keep animal shed hygienic and clean to avoid flies and
mosquitoes. For milch animals, regularly follow schedule of 1 kg feed + 50 g mineral
mixture per 2 liters of milk yield. Feed animals with a mixture of green grass + hay +
minerals + dry feed.
